PROFESSIONAL SUMMARY

Software Engineering undergraduate at MUET (CGPA: 3.17/4.00) with technical strengths in Python/SQL, machine learning model development, and secure application design. Seeking a software engineering role to apply these skills on a professional engineering team.

EDUCATION

B.Eng. in Software Engineering

Mehran University of Engineering & Technology (MUET) — Hyderabad, PK

- CGPA: 3.17 / 4.00 | Relevant Coursework: Software Development, Data Structures & Algorithms, Machine Learning, Database Systems, Information Security, Software Quality Assurance

TECHNICAL SKILLS

Programming: Python, C++, SQL

ML / Data Science: scikit-learn, Pandas, NumPy, NLP, Feature Engineering, Statistical Analysis, Model Evaluation

Data Management: Data Collection, Data Cleaning, Exploratory Data Analysis, Matplotlib, Seaborn, Plotly

Software Development: Streamlit, Tkinter GUI, Modular Architecture, Git, GitHub, Jupyter Notebook, VS Code

App Architecture: Web Apps (Streamlit), Desktop Apps (Tkinter), CLI Apps, REST API concepts

Security: Fernet/AES Encryption, SHA-256 Hashing, Symmetric Cryptography, Key Management

Soft Skills: Analytical Thinking, Problem-Solving, Cross-functional Collaboration, Team Leadership, Verbal & Written Communication (English)

PROJECTS

Olympics Data Analysis Web App

Python • Pandas • Streamlit • Plotly • Seaborn • Matplotlib | github.com/ahmedmustafa28/Olympics-Data-Analysis | *Deployed and publicly accessible on Streamlit Cloud*

- Built a 4-module analytics platform — Medal Tally, Overall Analysis, Country-Wise, and Athlete-Wise performance — covering 120+ years of Olympic data.
- Processed and analyzed 271,116+ athlete records (athlete_events.csv, noc_regions.csv) using Pandas; built interactive Plotly dashboards and Seaborn heatmaps to surface gender participation trends, event evolution, and top-athlete profiling.

WhatsApp Chat Analyzer

Python • Streamlit • NLP • Pandas • Seaborn • Matplotlib | github.com/ahmedmustafa28/WhatsApp-Chat-Analyzer | *Deployed and publicly accessible on Streamlit Cloud*

- Built an NLP-powered web app that ingests exported WhatsApp chat text files (media excluded) and generates 7+ analytical insights — activity timelines, emoji analysis, word clouds, weekly heatmaps, and per-user behavioral breakdowns across multi-user group chats.
- Designed a 3-module pipeline (preprocessor → helper → app) with a custom Hinglish stop-word filter to support accurate multi-user text analysis.

Mobile Inventory System

Python • Tkinter/Streamlit • SQL | github.com/ahmedmustafa28/mobile-inventory-system

- Built a modular inventory management application enabling users to add, update, and track stock records, generate transaction logs, and monitor inventory levels through an intuitive interface.
- Designed a relational database schema for products, stock, and transactions, implementing CRUD operations with input validation to maintain data accuracy and consistency.

Spam Email Detector

Python • scikit-learn • NLP • Pandas | github.com/ahmedmustafa28/spam-email-detector | *Deployed and publicly accessible on Streamlit Cloud*

- Built a text classification model to distinguish spam from legitimate emails, applying NLP preprocessing including tokenization, stop-word removal, and TF-IDF vectorization.
- Achieved 97.75% accuracy, 99.21% precision, 83.89% recall, and a 90.91% F1-score with a Random Forest classifier (best of 3 models compared) on the test set.

House Price Prediction

Python • scikit-learn • Pandas • Matplotlib | github.com/ahmedmustafa28/house-price-prediction | *Deployed and publicly accessible on Streamlit Cloud*

- Built a regression model to predict property prices from features such as location, area, and amenities, applying feature engineering and data cleaning.
- Achieved an RMSE of $100,444 and an R^2 of 0.918 with a Linear Regression model (best of 2 models compared) on the test set.

PROFESSIONAL EXPERIENCE

Full Stack AI Engineer — *ACEVA Technologies* Sept 2026 – Present

- Working as a Full Stack AI Engineer, contributing to the design and development of AI-integrated web applications across front-end and back-end layers.

AI/ML Intern (Remote) — *SAFEX Solutions* Jul 23, 2026 – Sep 22, 2026

- Completed an 8-week remote internship in AI/ML, gaining hands-on exposure to applied machine learning workflows, model development, and project execution.

AI/ML Fellow — *BrainWave* Aug 2026 – Sep 2026

- Completed an AI/ML Fellowship, strengthening applied machine learning and model development skills through structured, project-based learning (concurrent, part-time alongside the SAFEX Solutions internship and ACEVA role).

LEADERSHIP & ACTIVITIES

Director of Visuals — *WOH – Sindh Chapter* 2024 – 2025

- Led visual content strategy for a 50+ member chapter, delivering 10+ campaign assets per semester with 100% brand consistency.
- Coordinated 3 cross-functional sub-teams across 10+ events and mentored 5+ junior designers, cutting revision cycles and turnaround time by ~30%.

Director of Visuals — *WOH – MUET Chapter* 2023 – 2024

- Directed visual content strategy for the MUET chapter for one year prior to taking on the Sindh Chapter role, building the foundation for the chapter's design and branding processes.

Campus Ambassador — *Devsinc – MUET Chapter* Jul 2026 – Present

- Representing Devsinc at MUET, promoting the company's programs and opportunities and coordinating outreach activities within the student community.

Volunteer — *Sindh Tech* May 2026 – Present

- Volunteering in support of technology community initiatives and outreach programs across Sindh.

CERTIFICATIONS

Advanced Python Programming — NAVTTC • Introduction to NumPy — DataCamp • Web Development — NFTP • Prompt Engineering for Developers — Coursera
